

Bandspeed Selects Tavant Technologies for Product Development Center in India

AUSTIN, TX – July 5, 2006 – Bandspeed, the leader in Wi-Fi management platforms for the business mass market, today announced that the company has partnered with Tavant Technologies to set up a dedicated offshore development center in Bangalore, India. The Bangalore center will allow Bandspeed to continue to scale its product development and engineering efforts to meet the immediate go-to-market needs of OEM and ODM customers.

Bandspeed demonstrated its growth and market momentum to potential ODM and OEM customers through the recent launch of its AirMaestro Wi-Fi access point (AP) platform, and successful demonstrations of the AirMaestro solution at the 2006 Interop Tokyo conference. The partnership with Tavant will allow Bandspeed to attract an experienced team of world-class developers to expand the development of a solution that ODMs and OEMs have been waiting for – a WLAN solution that provides enterprise-class Wi-Fi networks for the mass market at an affordable price.

“By expanding Bandspeed’s product development organization to Bangalore, India, we will continue to attract the brightest engineering minds across the globe. This will allow us to round out our AirMaestro product line and aggressively move forward with our engineering efforts,” said Bill Eversole, president and CEO, Bandspeed.

Eversole noted that India was the preferred choice of location because it offers a huge pool of highly specialized, skilled talent, with the added advantage of lower costs.

“We chose to partner with Tavant Technologies in order to ensure seamless navigation of the local, cultural, finance, HR and legal issues unique to India. Tavant gives us the opportunity to concentrate on our core business while providing us with full back-office and support infrastructure, and to create an environment where we can work with our own dedicated employees,” said Ashok Yerneni, India Center Head, Bandspeed.

“We are pleased to partner with Bandspeed in its efforts to expand its business into India,” said Sarvesh Mahesh, CEO, Tavant Technologies. “We believe the company’s technology is clearly on the forefront of innovation and we wish them great success in their endeavor.”

About Bandspeed:

Bandspeed is the leader in next-generation Wi-Fi management providing AP solutions that make possible mission-critical Wi-Fi voice, data and video applications for the mass market. Bandspeed’s AirMaestro is an 802.11 Wi-Fi AP platform consisting of the AirMaestro software and integrated circuits (IC). Bandspeed is privately held and headquartered in Austin, Texas.
