

Ubicom Ships Five Million Processors for Communications and Media Processing Applications

Strong Customer Adoption of 802.11n Devices Drives the Demand for Ubicom's Technology

SUNNYVALE, Calif. – July 26, 2007 – Ubicom®, Inc., a leading provider of communications processor and software solutions, announced today that it has shipped more than five million units of its IP2000™, IP3000™ and StreamEngine 5000™ family processors for communications and media processing applications.

"The growing popularity of digital media has increased the demand for home networks and devices that can reliably transport voice, video, gaming and data traffic," said Cathal Phelan, CEO of Ubicom. "We are extremely pleased that these trends are accelerating the adoption of our technology in general, and in wireless 802.11n draft routers in particular. With the Wi-Fi Alliance now certifying 802.11n draft 2.0 interoperability, customers can buy with confidence, and we foresee a rapid shift from 802.11g- to 802.11n-based products on the horizon."

About Ubicom, Inc.

Ubicom develops communications and media processor (CMP) and software platforms that address the unique demands of real-time interactive applications and multimedia content delivery in the digital home. The company provides optimized system-level solutions to OEMs for a wide range of products including wireless routers, access points, bridges, VoIP gateways, streaming media devices, print servers and other network devices. Ubicom's unique multithreaded processor design, real-time operating system, and application-level solutions combine to ensure a high-quality user experience with unprecedented ease of use. Ubicom is a venture-backed, privately held company with corporate headquarters in Sunnyvale, California. For more information, visit www.ubicom.com.

NOTE: Ubicom, IP2000, IP3000, and StreamEngine 5000 are trademarks of Ubicom, Inc. All other trademarks are the property of their respective holders.
